

⊗ Day-1

Date:- 28/09/2025

① tell me about your self?

Ans:- My self K.C Kiran Sai chandan I am from Ananthapur.  
I have Completed My B-tech in Computer science with  
specialization Artificial Intelligence and Machine learning  
in Sri Venkateswara College of Engineering and technology,  
Chittoor, in 2025 which built My foundation in  
data analysis & Problem solving.

over time, I have developed strong technical skills in  
tools which are widely used in Data Analysis domain,  
which including Excel of Reporting, Power BI for Dash-  
Board Making, sql for data base querying, Python for  
data cleaning.

I have hands on Experience on Excel based Project  
one is Covid 19 data analysis & another on Real world  
sales data, where I used Pivot tables for  
Summarizing data for making (or) Creating Insights, AND charts  
for understanding Data, slices & time lines for Quick  
Selection of Data.

② why did you choose a career in Data analytics?

Ans) I Chosen this data Analytics Domain Because I have Curiosity about how data Can Be stored and Retrieved for Getting Information about Company. And also My ~~gta~~ Background of study was linked to this field.

A I would love to work with data where we Can see the Growth & loss of a Company. Mainly I providing (or) giving suggestion for Growth of Company was Important and I am very good at it.

So, I have Chosen this Domain.

③. what Do you know about our Company & why do you want to work here?

Ans:- AT our Company many Products & developments will happen. and In market our Company have Grate Position In a certain field where In the Company focus on Company growth and Employees working space & Environment. AND Growth.

And I am likely to join in the Company Because our Company is known for Innovation and Employee growth. I believe it is a Perfect Place for me to start my Career and Contribute.

④. Describe a time when you faced a Challenge in a Project and how you handled it?

Ans:- In Recent time I have Done 2 Projects in Excel, In two Projects one was given Reference Video and other one have to Do it By My own. one Project I Did Based on Reference Video and when it Comes to Do By own, I have faced some challenges for Dividing data into certain Categories and Making them featured. I have handled it By spending More time and Completed my Project. It's all about understanding Data set & using a Correct Visualization for it.

⑤. How do you handle tight Deadlines (or) Pressure at work?

Ans:- Firstly, I Do work in a Specific Span of time that which Before Dead line and I will Do work as Breaking Down work into small parts which will help to achieve a short time Goal and Can lead to achieve long term goal that is Completion.

of work Before Dead line, I Can handel the Pressure at work place By Being calm and giving Preference to tasks, focusing on Problem solving step by step.

⑥ How Do you Explain Complex data insights to non-technical People?

As. I will firstly create a Dash Board with Normal Colours and Make the raw data into Meaningful Insights. and then I will start Explaining Data By taking stand real world Examples and Making the Explanation as a story By that the Non-technical People Can understand Complex data insights.

⑦ Describe a situation where your analysis or recommendations made a Positive impact.

Ans:- A situation that crypto Currency Trade I have some knowledge or I know something In crypto Currency trading At majority members know the Bit. Coin where it Price was in just tens in Past Now Present one crore. I have analysed when it was at 50 lacs and By knowing its trend by Graph which inbuiltly Present in Application and Past Prices of

Bob - coin, And Now it Became one coin which was  
If I invested some fund it will increase by ~~100%~~  
100% + today. there my analysis made a Positive  
Impact Myself.

⑧ How do you handle feedback or criticism?

As Feedback is essential for Personal growth of  
Professional side. I can take feedback and  
I can improve myself by focusing. Feedback means  
of knowing our self by others perspective. By  
that we can improve Myself.

⑨ What are your short-term goal & long-term  
Career Goals?

Ans: - My short-term Career goal is to build  
My technical skills on data analysis Domain.  
where these skills help to get job in data  
analysis Domain.

And long-term Career goal is to level up  
My role I'm data analysis leading role. when was  
higher level in the role of data analysis.  
↓  
Position

⑩ What Motivates you to do your Best work?

Ans:- I am motivated By the idea of finding Insights that real Difference. whether that's improving a Process, solving a Problem.

I also enjoy learning new tools and techniques which keeps me Engaged & Motivated to continuously improve my performance.
